RAM 5500

Front Brake Upgrade

Key features & benefits

- Gains in performance over standard duty braking system:
  - Increase in pad area
  - Substantial increase in available brake torque
  - Reduction in pedal effort
- Ductile iron caliper housing providing maximum strength and stiffness, as well as high resistance to impact and fatigue
- Acid zinc finish for maximum corrosion protection
- High friction pads increase stopping power
- Increased pad area reduces temperatures and increases pad life at armoured vehicle weights

Specifications

- High temperature seal material
- Wiper seal on every piston for dirt exclusion
- Compatible with stock OEM actuation
- Discrete styling
- Bleed screws on in-board side only for maximum tamper-proof safety
- Pad push-back springs for optimum wear resistance off-road

Application

2019 onwards - RAM 5500 pickup truck

Usage

Armoured up to 14,000kg
On and off-road

(Vehicle rating is based upon generic vehicle data. Specific vehicle axle weights, tyre rolling radii, centres of gravity, maximum speed, etc. may vary by customer application. Alcon cannot be liable for issues relating to variances of vehicle specification)

Included in the kit

2x calipers, 1x heavy duty pad set

FRONT KIT	
Brake Kit Part No.	
Caliper	6 Piston
Size (Pistons)	6x54mm
Disc	OE fit
Pad Material	Heavy Duty
