Chevrolet Tahoe / GMC Yukon

Front Brake Upgrade

alcon
specialist brakes & clutches

Key features & benefits

- Gains in performance over stock standard duty braking system:
  - Up to 12% reduction in disc temperature rise
  - Up to 40% reduction in front and rear pad work rates
  - Up to 8% increase in available brake torque
  - Up to 8% reduction in pedal effort
- Ductile iron caliper housing providing maximum strength and stiffness as well as high resistance to impact and fatigue
- Acid zinc finish for maximum corrosion protection
- High friction pads increase stopping power
- Increased diameter and thickness of discs increase brake torque and thermal capacity allowing the vehicle to safely operate at armoured weights and reducing potential for brake fade
- Increased pad area reduces temperatures and increases pad life at armoured vehicle weights

Specifications

- High temperature seal material
- Wiper seal on every piston for dirt exclusion
- Compatible with stock OEM actuation
- Compatible with MSW armoured specification 18" wheels and many other specialist wheels
- Discrete styling
- Bleed screws on in-board side only for maximum tamper-proof safety
- Pad push-back springs for optimum wear resistance off-road

Application

2022 onwards - Chevrolet Tahoe, Chevrolet Suburban, GMC Yukon, Cadillac Escalade

Usage

Armoured up to 5,500kg
On and off-road

(Vehicle rating is based upon generic vehicle data. Specific vehicle axle weights, tyre rolling radii, centres of gravity, maximum speed, etc. may vary by customer application. Alcon cannot be liable for issues relating to variances of vehicle specification)

Included in the kit

ALCON components: 2x front calipers, 2x front discs, 1x heavy duty pad set, 2x mounting brackets, 1x banjo bolt adaptor kit

FRONT KIT	
Brake Kit Part No.	BKF1559BF89
Caliper	6 Piston
Size (Pistons)	41.3/44.5/41.3 mm
Disc	372x35mm
Pad Material	Heavy Duty
