

Key features & benefits

- Gains in performance over standard duty braking system:
 - Reduction in disc temperature rise
 - Up to 35% reduction in front pad work rates
 - Substantial increase in available brake torque
 - Reduction in pedal effort
- Ductile iron caliper housing providing maximum strength and stiffness as well as high resistance to impact and fatigue
- Acid zinc finish for maximum corrosion protection
- High friction pads increase stopping power
- Large discs increase brake torque and thermal capacity, allowing the vehicle to safely operate at armoured weights and reducing potential for brake fade
- Increased pad area reduces temperatures and increases pad life at armoured vehicle weights

Specifications

- High temperature seal material
- Wiper seal on every piston for dirt exclusion
- Compatible with stock OEM actuation
- Fits many 18" specialist wheels
- Discrete styling
- Bleed screws on in-board side only for maximum tamper-proof safety
- Pad push-back springs for optimum wear resistance off-road

Fits

2010 onwards - 6th generation 5.6 litre V8 (Y62)

Usage

Armoured up to 5,800kg
On and off-road

(Vehicle rating is based upon generic vehicle data. Specific vehicle axle weights, tyre rolling radii, centres of gravity, maximum speed, etc. may vary by customer application. Alcon cannot be liable for issues relating to variances of vehicle specification)

Included in the kit

2x front calipers, 2x front discs, 2x bracket kits,
2x heavy duty pad sets

FRONT KIT	
Brake Kit Part No.	BKC1559P06
Caliper	6 piston
Size (Pistons)	6x44.5mm
Disc	370x36mm
Pad Material	Heavy duty

6 piston front caliper ▲
