

CREW COMPARTMENT FIRE SUPPRESSION KIT

3M NOVEC 1230 REMOTE DISCHARGE SYSTEM

This system is designed specifically for crew compartments of APC's and larger Military Vehicles where multiple occupants require protection in a larger area.

The remote pressure discharge technology of this system ensures rapid delivery of Novec 1230 Extinguishant via a single fixed nozzle.

The system is operated via manual push button activation with the option of 'Protectowire' automatic temperature sensitive activation. The system deploys to flood-fill the crew compartment of the vehicle.

These systems offer the highest possible fire knock-down capability and protection to troops whilst remaining non-toxic when specified in the correct concentration.
